Vista API

PDS Cloud customers are now eligible to preview the Vista API. Put your employee data to work via a rich Application Programming Interface (API). Leverage employee data to automate and drive upstream and downstream workflows.

Key Features

- *Seamless integration*: Vista API is designed for easy integration with your existing systems and workflows, reducing development time and effort.
- *Comprehensive documentation*: Get started quickly with our detailed documentation, complete with step-by-step guides and code samples.
- *High performance*: Experience fast response times and reliable performance, even at scale.
- *Secure and scalable*: Built with security in mind, Vista API integrates your existing Vista Security and supports industry-standard authentication methods and scales effortlessly with your growing needs.
- *Extensive support*: Access a wealth of resources, dedicated support, and regular updates.

Get Started Today!

PDS Cloud customers who would like to participate in the Vista API private preview should submit a PDS Service Center ticket with the title Vista API Private Preview.

Private previews provide early access to the latest PDS products and services. Customers will work with a dedicated PDS team through the review and go-live process. Access to the private previews is available to a limited number of customers.
